Deep Diving into SAP HANA SQL Performance Fluctuation - Course Completion

Course Completion - Intermediate Level

Issued by SAP Learning on September 3, 2026

- This badge verifies that the learner has completed the course "Deep Diving into SAP HANA SQL Performance Fluctuation" on Intermediate Level. The learner is familiar with the following topics:
- o Identify and define SQL performance fluctuations in SAP HANA.
 - o Trace and monitor query execution over time using SAP HANA traces and monitoring views, ruling out application-level factors.
 - o Dive into HANA internals - examine how input parameters, data distribution, optimizer statistics, and plan changes affect runtime.
 - o Apply HANA's SQL Plan Management features.

Skills: Database Queries , SAP HANA , SQL (Programming Language)
